

## Furkan Canlı – Tennis Coach

Hello, I am Furkan Canlı. I came to tennis in 2013 and this sport quickly became an indispensable part of life. In the early years of my career, I worked as an assistant coach and playing partner, contributing to the experience gained on the field and the development of athletes.

In order to gain experience in the field of coaching, I attended various courses and received a level 2 coaching certificate. During this process, I gained important information both technically and through training this knowledge allowed me to work more effectively with my athletes.

At the same time, I continued my academic education and graduated from Trakya University Kırkpınar Faculty of Sports Sciences. During my university years, I participated in leagues with our university team and achieved the success of playing in the finals twice. This experience was the reason for understanding the determination and discipline needed both individually and as a team.

In my professional career, I worked as the infrastructure coordinator at one of Turkey's leading clubs. In this role, I focused on the development of young talent and ensured that the club infrastructure system were running successfully. We achieved significant success in various tournaments with the athletes I have worked with. Some of my athletes have become tournament champions, while others have managed to play in the finals.
